## USBasp Driver

The USBasp is the hardware tool used to flash the software into the microcontroller flash memory.

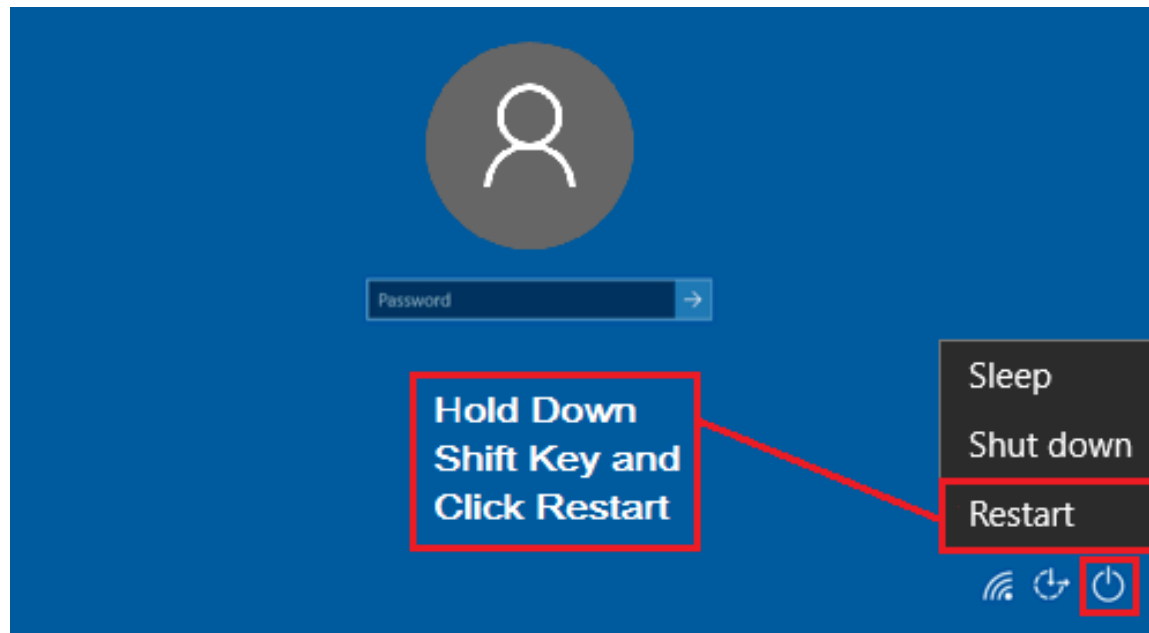

## USBasp Driver

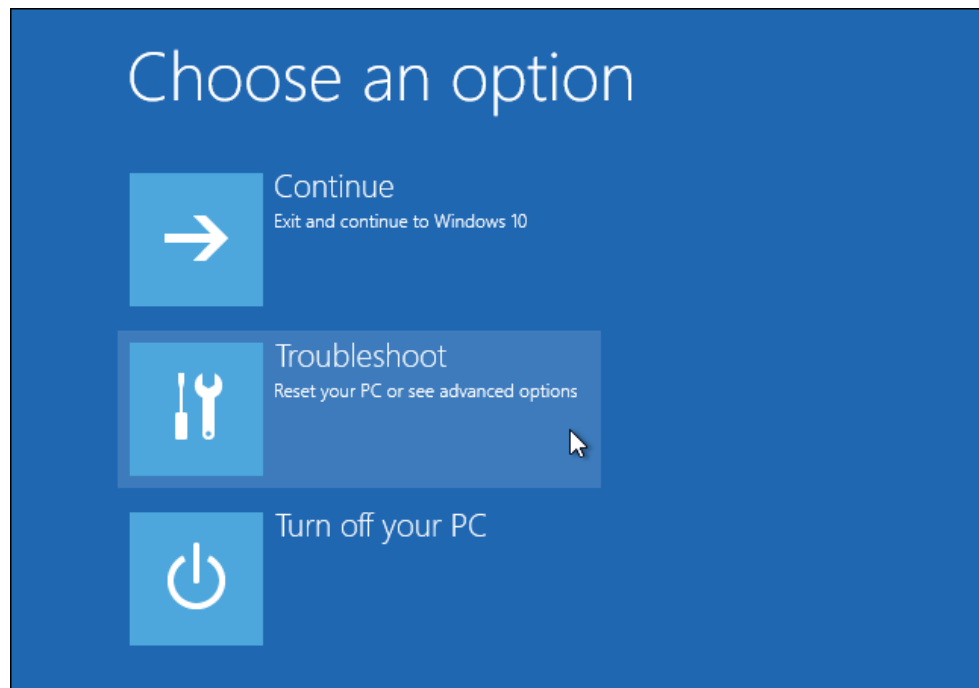

**This step only for windows 8 and 10**

Before installing the driver, we shall disable the “Driver Signature Check” feature for *windows 8 and 10 only* to allow us to install the driver correctly.

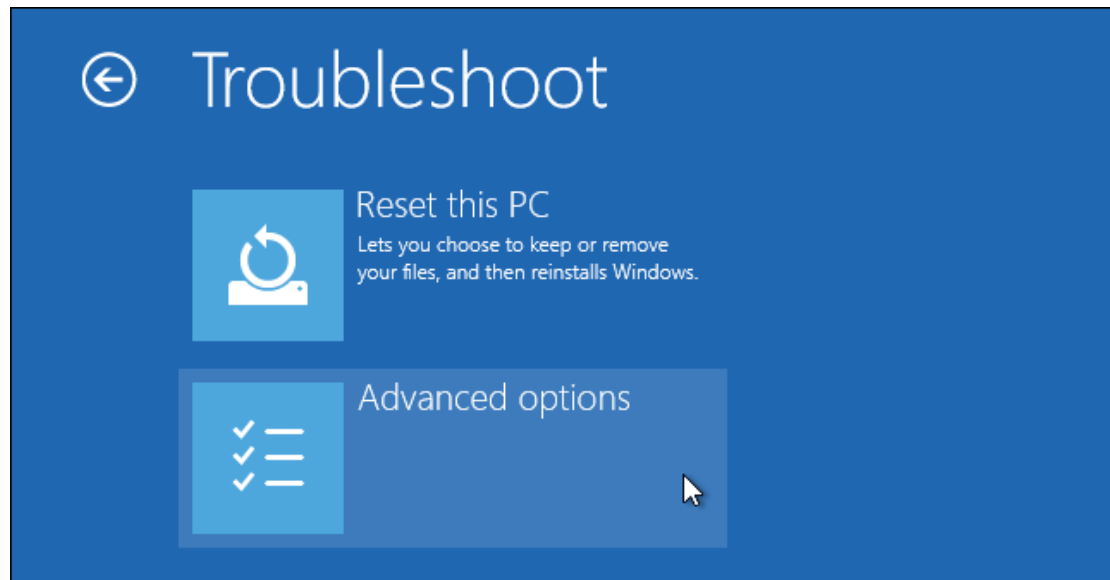

1- Hold down the Shift key while you click the “Restart” option in Windows.

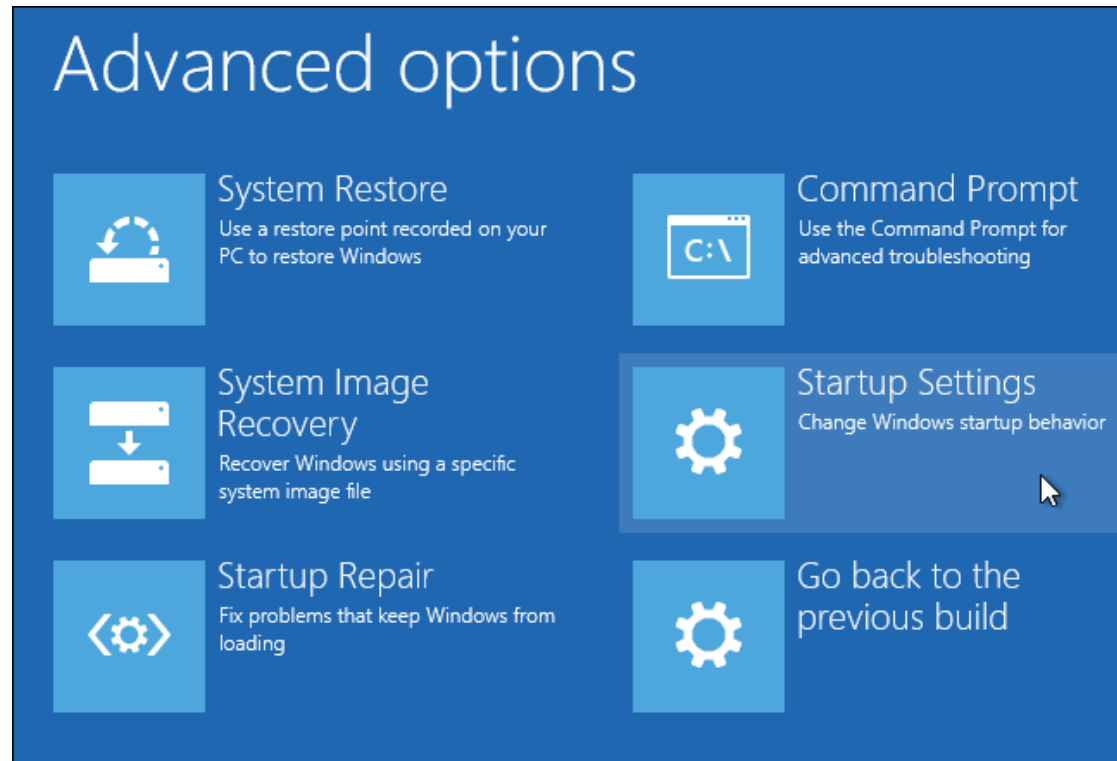

2- Select the “Troubleshoot” tile on the Choose an option screen that appears.

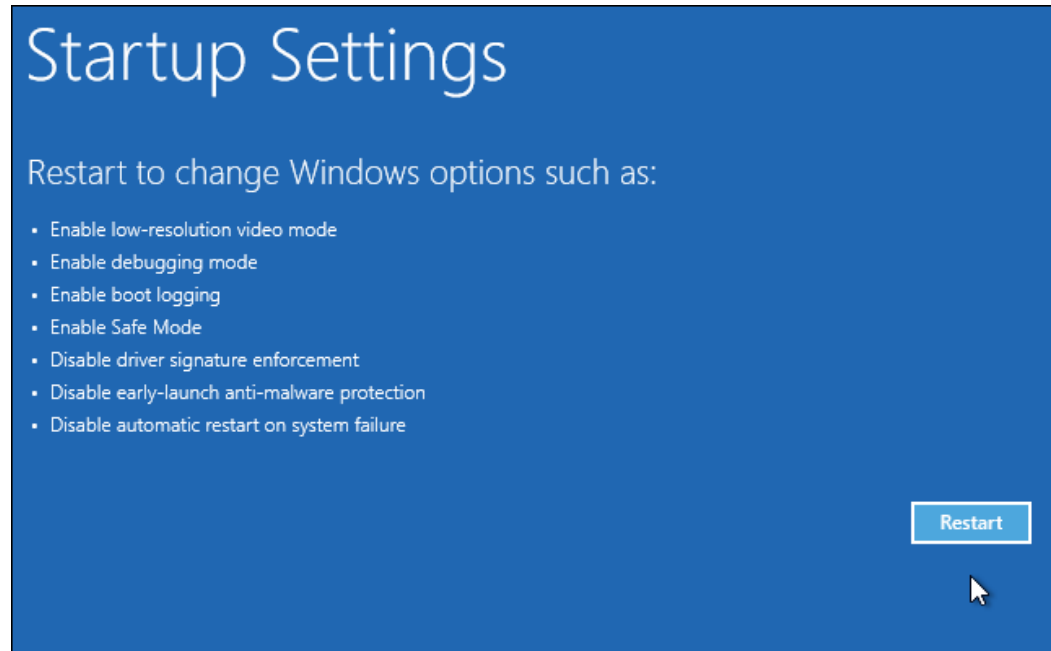

3- Select “Advanced options”.

4- Click the “Startup Settings”.

5- Click the “Restart” button to restart your PC into the Startup Settings screen.

6- Type “7” or “F7” at the Startup Settings screen to activate the “Disable driver signature enforcement” option.

## Startup Settings

Press a number to choose from the options below:

Use number keys or functions keys F1-F9.

- 1) Enable debugging
- 2) Enable boot logging
- 3) Enable low-resolution video
- 4) Enable Safe Mode
- 5) Enable Safe Mode with Networking
- 6) Enable Safe Mode with Command Prompt
- 7) Disable driver signature enforcement
- 8) Disable early launch anti-malware protection
- 9) Disable automatic restart after failure

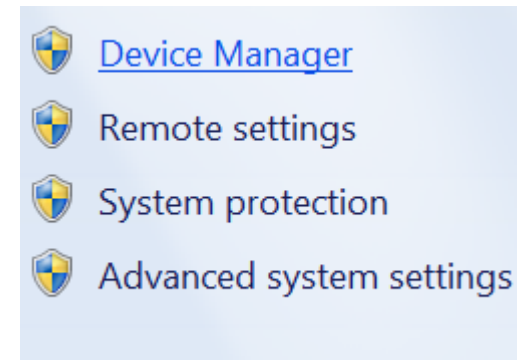

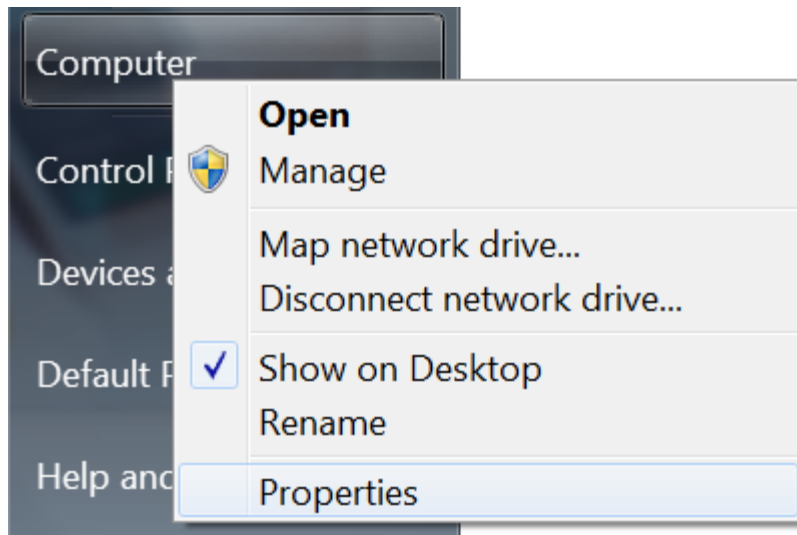

Press F10 for more options

Press Enter to return to your operating system

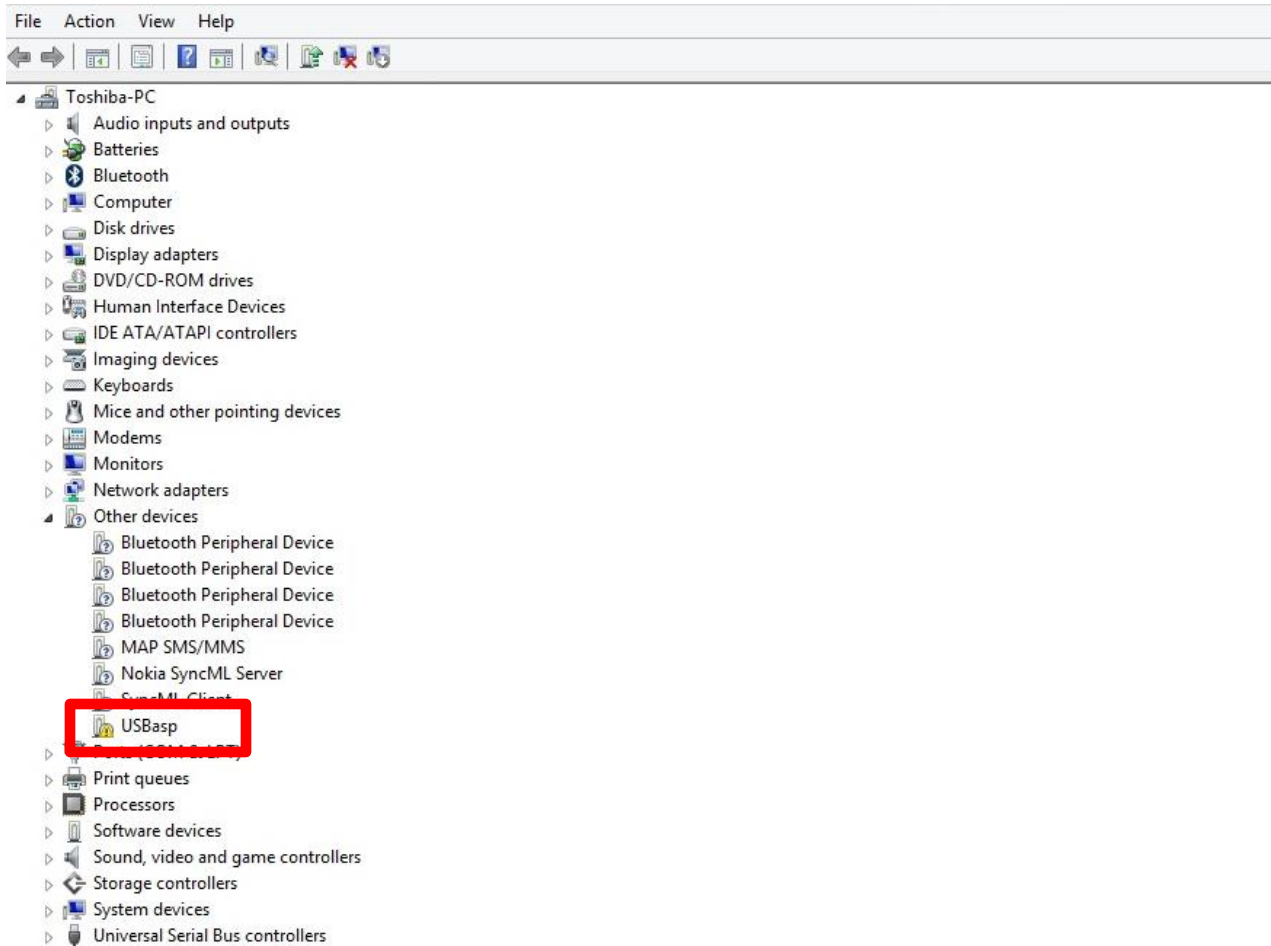

## USBasp Driver

For all operating systems, right click on *“My Computer”* or *“This PC”* and choose **Properties** then click **Device Manager**.

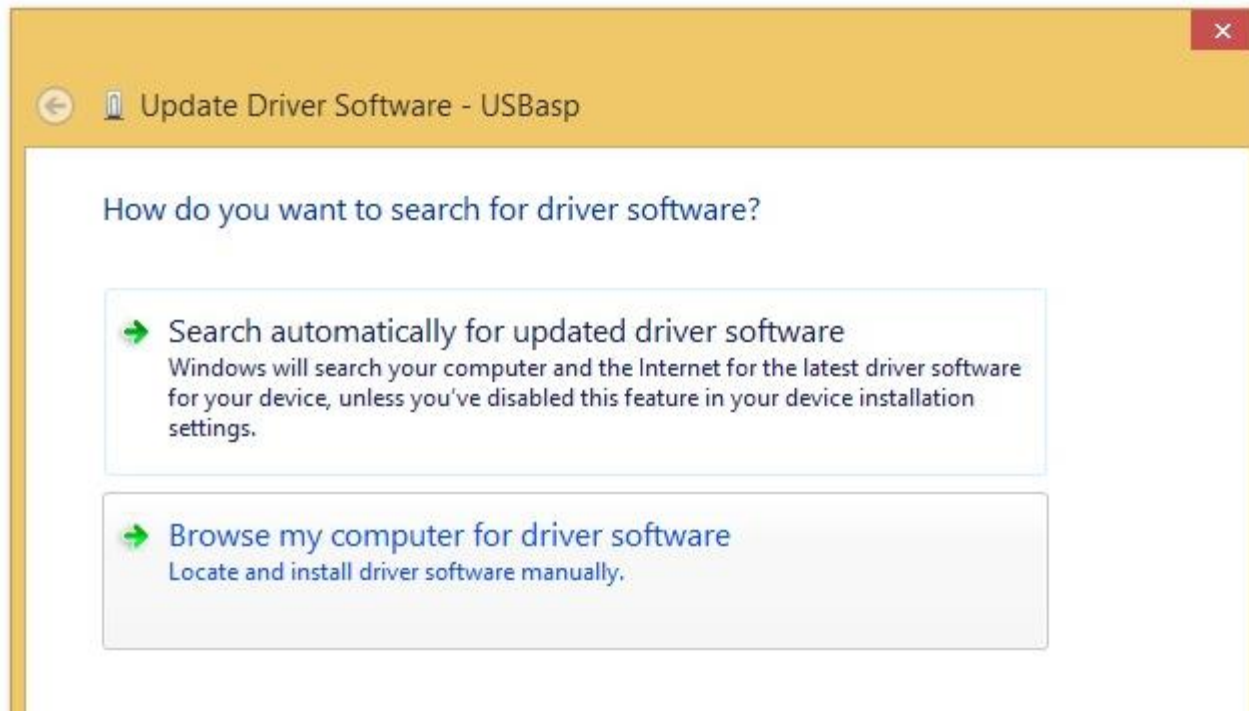

# USBasp Driver

You shall find the USBasp with this yellow exclamation mark. Right click on it and choose **“Update”**

Choose “Browse my computer for driver software”.

## USBasp Driver

Browse to: ***\\IMT Tools\Drivers\usbasp-windriver.2011-05-28***

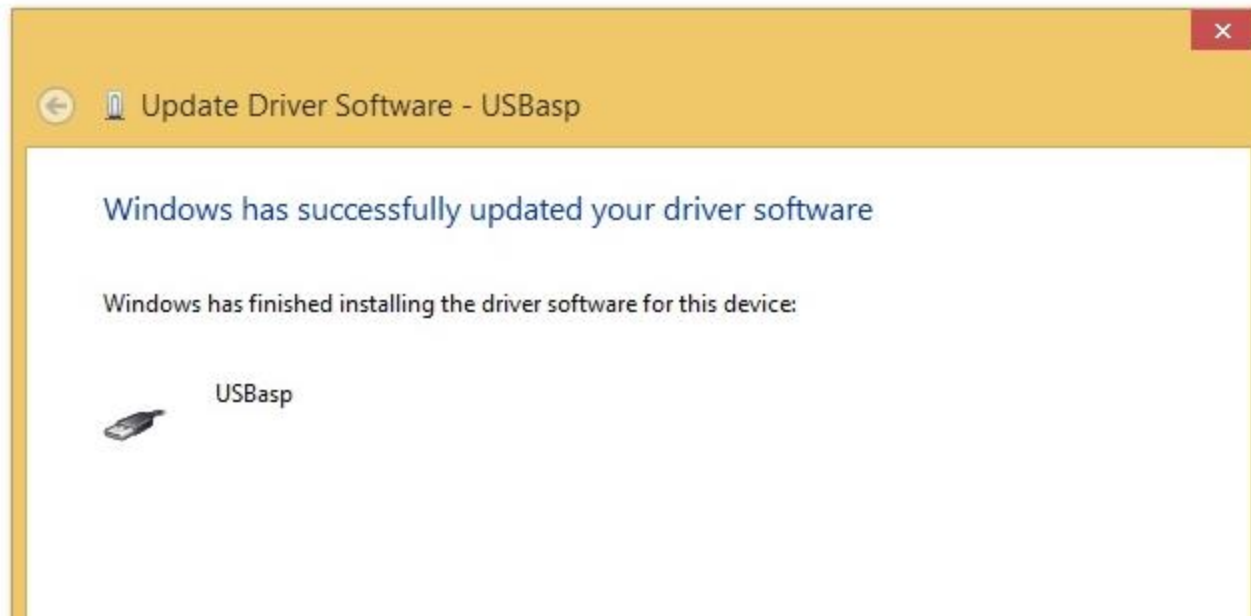

## USBasp Driver

When this warning appear, choose “Install this driver software anyway”.

Finally the driver has been successfully installed.
